

Session 1 Discussion

1. Where do your students come from? How much background to Creation do they have?
2. What exposures to Evolution do (or will) your students face? Generate a list. From that list, what source of exposure is most concerning?
3. Does your curriculum address Evolution? List specifics.
4. Why are so many teachers hesitant to address Evolution?
5. How were you educated about Evolution? How much background?
6. Where do your student go following graduation from your school? What challenges about Creation will they face?
7. How can a discussion about Evolution turn into an evangelism opportunity?
8. Examine your science texts. Where is Evolution taught, either directly or indirectly?
